

**OVERVIEW:** This document will be your official guide to the lockdown procedures of sectors. These procedures are codename-based, where each codename represents a different set of actions and procedures to follow to conduct the lockdown. The lockdowns also include a priority number, which will represent the priority, or how fast to respond, of these lockdowns. Some of the lockdowns will have autonomous functions, such as blast doors, alarms, locking sectors (that can be overridden), etc, as well.

**DATE:** 25th December 2022

### **How lockdowns are activated:**

Lockdowns can be triggered in several different ways. O4 personnel, being senior security and administration officials, are authorized to trigger lockdown procedures through radio communication and the primary control room.

These following members are **O4** personnel:

- **SD:** Commander
- **ISD:** Commander, Sergeant
- **MTF:** Commander, Captain
- **AD:** Department Leader, Site Director.

### **Priority Letters:**

A – **adequate** response; avoid sector, normal duties

B – **immediate** response; site personnel to avoid sector and leave

C – **rapid response**; site personnel to be moved out of sector effective immediately

D – **drop everything**; kill test subjects, secure site personnel in breach shelters

E – **immediate lockdown**; immediate personnel summon out of sector

### **Lockdown Code Procedures:**

#### **BLUE:**

- *Synopsis: Suggests the escape of a sentient object below human intelligence and capable of movement.*
- *Special Guidance: N/A, follow security orders*
- *Listed MTFs: Epsilon-11 [“Nine-Tailed Fox”]*

#### **SUPERBLUE:**

- *Synopsis: Suggests the escape of a sentient object equal or above human intelligence and capable of movement.*
- *Special Guidance: N/A, follow code **BLUE***
- *Listed MTFs: N/A, follow code **BLUE***

#### **GREEN:**

- *Synopsis: Suggests possible threat derived from a biohazard, infectious, or other contamination source. Highly infectious microorganisms or biological weapons capable of dramatically increasing in severity unless countered. Not necessarily the escape of a single object. It may be also used in conjunction with another classification to signify a biohazardous threat.*
- *Special Guidance: Staff are to avoid contact with sources of contamination or contaminated individuals. Do not leave the site. Staff should be expected to be quarantined after the event if they were in the sector of the source.*
- *Listed MTFs: N/A, follow code **BLUE***

**RED:**

- *Synopsis: A large-scale aggressor (LSA) such as SCP-323 has escaped containment and currently poses a substantial threat to the site and foundation secrecy.*
- *Special Guidance: N/A, follow orders from security or MTF personnel.*
- *Listed MTFs: Usually of upper priority, most battalion-strength Armed MTFs are expected to be sorted such as MTF-Nu-7["Hammer Down"]*

**BLACK:**

- *Synopsis: Suggests the escape of an NTT (non-terminable threat) such as SCP-096. An NTT is defined as a threat that, given the circumstances or present resources, is unable to be terminated by response teams during the incident, or are otherwise invulnerable to any form of attack.*
- *Special Guidance: Staff move to the nearest shelter; Class A personnel are to be evacuated. Do not engage fire on the NTT unless it has been proven to slow/hinder the advance of the threat.*
- *Listed MTFs: MTF-Epsilon-11["Nine-Tailed-Fox"]*

**WHITE:**

- *Synopsis: Describes the assault of a highly organized major/minor assimilation force that on-site security is unable to combat.*
- *Special Guidance: Staff are advised to seek shelter immediately. All SCP objects are to be put into lockdown, all tests are to end with termination, and all doors/entrances to the site blocked and secured. Data banks are to be encrypted to prevent hostile acquisition of vital information. Security is to protect staff and assets.*
- *Listed MTFs: All battalion-forces; armed MTFs such as MTF-Nu-7["Hammer Down"]*

**GRAY:**

- *Synopsis: identical to code **WHITE**, however, highlights that the hostile incursion force originated from within the site, often in the form of false staff members (insiders). Conveys that hostiles are already within the site, and that on-site security may be highly disordered and compromised.*
- *Special Guidance: Identical to code **WHITE**.*
- *Listed MTFs: Identical to code **WHITE**.*

**BLANK:**

- *Synopsis: Describes an undescribed threat. To be immediately updated to a possible thread code if applicable, otherwise, to code **SUPERBLANK**.*
- *Special Guidance: Staff are to listen to security.*
- *Listed MTFs: N/A*

**SUPERBLANK:**

- *Synopsis: Describes an indescribable threat. Depending on the severity of the threat, the high-ranking personnel are to distribute orders through communications or landlines if they are unavailable.*
- *Special Guidance: Staff are to listen to security, or MTF if applicable.*
- *Listed MTFs: If called upon by high-ranking personnel.*

**Basic Lockdown Example:**

[SECTOR] / [PRIORITY\_LETTER] / [CODE\_NAME]

Sectors: 1, 2, 3

Priority Letters: A, B, C, D, E (A being low, E being High)

Class: BLUE, RED, ORANGE, PURPLE, BLACK, GREEN

S3/A/BLUE>> adequate response at sector 3
